MEMORANDUM

To: Liz Uhl
From: Carl Malsom 
Date: August 26, 1992
Re: Anson Enterprises Subcontract

This is a summary of telephone conversations with Rich Anson of Anson Enterprises regarding possible extras on the Field Support Area subcontract.

August 24, 1992 - I spoke with Rich about the need for some excavating and gravel that may be needed to connect the relocated field support area to the existing road on the landfill. Rich said he thought it would be 4 to 6 hours of dozer work at \$100/hour plus gravel at \$11/yard. Total costs should be under \$1,000. I told him to plan on doing the work and we would negotiate the cost and include it by change order.

August 25, 1992 - I called Rich Anson about the possible inability to define the fence location on the west side of the site. This might require Anson to demobilize the dozer then remobilize later. We didn't discuss specifics about cost, but I told him we would consider his request if delay in locating the fence line caused demobilization then remobilization.
